FREE WORKSHOPS

What is ATT?

Australian Trusted Trader is a free trade facilitation program which is run by the Australian Border Force. The aim of the program is to recognise and accredit Australian businesses who have secure international supply chain practices and reward them with access to a range of trade facilitation benefits. These benefits are designed to give Australian businesses a competitive edge and greater access to global markets.

Attend this workshop and receive an overview of the program, followed by a question and answer session. The Trusted Trader team will also be available to assist your business in completing an application form on the day.
